ABOUT ME

Artificial Intelligence undergraduate with hands-on experience in Machine Learning, Generative AI, and AI-powered application development. Skilled in Python, Flask, Scikit-learn, REST APIs, and predictive modeling, with practical experience in LLM integration, Agentic AI workflows, and end-to-end AI systems. Passionate about building scalable, real-world AI solutions focused on automation, analytics, and intelligent decision-making.

EDUCATION

G. H. Rasoni college of Engineering Nagpur

Nov 2022 - May 2026

Bachelor of technology in Artificial intelligence | 7th semester (CGPA - 9.01)

TECHNICAL SKILLS

- **Programming:** Python, SQL, C++
- **Databases:** PostgreSQL, MySQL
- **Generative AI & AI Engineering:** GenAI, LLM's, Agentic AI, Prompt Engineering, AI Workflow Automation
- **Libraries & Framework:** NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, Flask, Streamlit
- **Machine Learning:** classification, Regression, Random Forest, KNN, K-Means , Model Evaluation, Feature Engineering
- **Concepts:** Data Structures & Algorithms, DBMS, Exploratory Data Analysis (EDA), Data Preprocessing, Model Building, Software Development Lifecycle (SDLC)
- **Tools:** Power BI, Jupyter Notebook, Google Colab, MySQL Workbench, Github
- **Soft Skills:** Problem-Solving, Team Leadership, Collaboration, Effective Communication, Analytical Thinking

INTERSHIPS

Low-Latency Technologies Pvt. Ltd, Pune (AI Engineer Intern)

Dec 2025 - May 2026

- Contributed to an enterprise-grade healthcare AI system for patient risk prediction using Agentic AI workflows.
- Developed ML models for health risk assessment using clinical and lifestyle parameters.
- Integrated LLMs to generate explainable clinical insights and recommendations.
- Built end-to-end AI pipelines including preprocessing, model training, evaluation, and real-time inference.

Infosys SpringBoard Internship 6.0 (AI Intern)

Sep 2025 - Nov 2025

- Developed an ML-based sports analytics system (ScoreSight) to predict team points and top scorers using Python and Scikit-learn.
- Implemented and compared multiple models including Random Forest, XGBoost, and Logistic Regression.
- Designed a weighted Voting Classifier ensemble that improved model generalization and reduced overfitting.
- Built data preprocessing pipelines, performed feature engineering, and validated models using standard evaluation metrics.
- Integrated APIs and contributed to frontend components to enhance system usability.
- Achieved overall prediction accuracy of 75.7% through model tuning and performance optimization.

PROJECTS

Patient AI Prediction & Risk Assessment using Agentic AI

Jan 2026 - May 2026

- Developed an AI-powered healthcare system for patient risk prediction using ML and Agentic AI workflows.
- Integrated LLMs for explainable clinical insights and recommendations.
- Built Flask APIs and real-time prediction pipelines for intelligent monitoring.

ScoreSight- Predicting EPL Points Tally, Top Scorer using Machine Learning

Jul 2025 - Nov 2025

Developed ScoreSight, an ML-based football analytics system using Python and scikit-learn to predict English Premier League team points tally and top scorers by applying advanced feature engineering on multi-season data, capturing team form, performance, and momentum for accurate forecasting

CERTIFICATIONS

- Oracle AI Foundation Certification from Oracle University
- RDBMS PostgreSQL Training by Spoken Tutorial, IIT Bombay
- Generative Artificial intelligence and NLP at centre of Excellence AI and ML
